You've reached the max skill lvl

Should I put it all on Strength?
Should I pour it all into one thing...or just a little here and a little there to slowly build up? Will take longer but it'll be stronger in the long run to make up for it
What a big man as a bodyguard... Really good for nothing!

Class Window
Even a healer can provide several advantages, can he not?
It's not like every healer needs to be protected by someone
Seems like the players in the starting village has leveled up here by occupying the good places since morning
So? I want to level up then I gotta get my stuff together and move on
...to be able to skip to the higher level monsters
嗷呜!

Pretty good

Hey, Friend

走出
You will not be able to kill that boar king alone
Join our party
I dont have a full team yet
You are,

The thing is, you cant kill anything, and we lack a healer
I have one Condition
What condition?
I want a/the sword
Sword?

哈哈哈哈哈
Dude! you really are interesting!
Do you know how much str a healer will need to reach the wear conditions?
did you not rank up any healing spells at between level 2-9?
Its high enough i don t need to max it at this level
I am not a dedicated healer so that s why I will need a sword aswell
Alright, you are quite funny
I ll add you on my friends list.
The monk will be the tank and the alchemist will handle the dps
Alright, we ll let you take care of the healing then
Okay

Finally finished with translating and editing this chapter, i cannot say if its correctly done or not since i might know one or maybe 2 chinese words haha, but i tried my best with a few tools and i THINK i got some places alright atleast :O

anwyay, I hope you enjoyed this chapter since there is no real guarantee that i will do the other chapters aswell, maybe if I have a real translator or some other kind of help since its taking quite a while to translate, edit, redraw, typset and clean on my own (well done people of those that knows how to do that on their own ^^)

There is also a few places where i didnt translate because of a few reasons, either i was unable to recognize the writing so it just looked like nothing to me, or i felt that it was not needed and this is especially on some fsx bubbles

well this will be enough from me :P

*p.s yes it is a boring cred page, i cannot paint ^^*
